SUMMARY

AWS Certified Solutions Architect and DevOps Engineer with 2+ years of experience designing and operating scalable cloud-native infrastructure on AWS. Skilled in building highly available microservices architectures using Kubernetes, Docker, and Infrastructure as Code (Terraform, CloudFormation). Experienced in implementing CI/CD pipelines, observability platforms, and cost-optimized cloud environments supporting high-traffic applications and millions of daily transactions. Proven ability to improve deployment velocity, enhance system reliability, and automate infrastructure operations.

WORK EXPERIENCE

Logicwind Technologies — **September 2024 – Present**
DevOps — *Surat, India*

Toshal Infotech — **January 2024 – June 2024**
DevOps Intern — *Surat, India*

Toshal Infotech — **May 2023 – October 2023**
AWS Intern — *Surat, India*

Key Implementations

- Architected and deployed production-grade AWS infrastructure for a high-traffic application processing 10M+ daily database transactions, using 100% Infrastructure as Code with AWS CloudFormation.
- Designed a scalable three-tier microservices architecture using Amazon ECS, RDS Multi-AZ, ElastiCache (Redis), and automated scheduler jobs, ensuring high availability and fault tolerance.
- Managed large-scale AWS infrastructure including EC2, S3, RDS, VPC, and Auto Scaling Groups, implemented using Terraform and CloudFormation for Infrastructure as Code.
- Implemented intelligent edge caching using Cloudflare Workers, reducing origin server load by 65% and infrastructure costs by 45%.
- Led SOC 2 compliance implementation, establishing security monitoring, logging standards, and operational controls across cloud infrastructure.
- Optimized cloud costs by 40% through Reserved Instances, Spot Instances, and automated resource scheduling strategies.
- Improved Kubernetes cluster reliability and deployment efficiency by implementing rolling updates and auto-scaling policies.
- Built centralized logging architecture using EFK Stack and Grafana Loki, enabling faster debugging and efficient root cause analysis.
- Designed and implemented CI/CD pipelines using GitLab CI/CD, Bitbucket Pipelines, and GitHub Actions, enabling automated build, test, and deployment workflows.
- Reduced deployment time by 95% by implementing Blue-Green and Canary deployment strategies, ensuring near-zero downtime releases.

TECHNICAL SKILLS

- **Cloud Platforms:** Amazon Web Services (EC2, S3, RDS, ECS, CloudFront, Route 53, IAM, CloudWatch), Microsoft Azure
- **Containerization & Orchestration:** Docker, Docker Compose, Kubernetes
- **Version Control:** Git, GitHub, GitLab, Bitbucket
- **Programming Languages:** Bash, Python
- **CI/CD Tools:** GitLab CI/CD, GitHub Actions, Jenkins
- **Infrastructure as Code (IaC):** Terraform, AWS CloudFormation
- **Security & Compliance:** SOC 2 Compliance, Identity & Access Management (IAM)

EDUCATION

Asha M. Tarsadia Institute of Computer Science and Technology — **2021 – 2025**
Bachelor of Technology in Computer Science (Cloud Computing) — *Surat, Gujarat*

ONLINE COURSES & CERTIFICATES

- AWS Solutions Architect – Associate - **AWS**
